

Option 4

Delay Project until Grant Funding is Available

The County is not aware of any available Federal or Provincial grants. The Clean Harbors' grant accumulates at the rate of \$120,000 per year. Without any funding other than the Clean Harbors' grant, it will be over 28 years before enough funds have accumulated to complete the entire project (assuming costs do not increase).

Note: even if other grants become available, each property owner will be required to pay installation costs and the monthly utility fee (see *What is the Project Cost?* poster).

Benefits:

- Depending on the grant criteria, there will be no cost (or reduced cost) to the landowner other than the individual hook-up fee

Challenges:

- Total project cost may be higher once grant funding becomes available
- Clean Harbors' grant is not guaranteed
