

Option 5

Delay Project until Clean Harbors' Grant is Guaranteed

Clean Harbors' current level of funding is \$120,000 per year.

Note: even if the project proceeds with guaranteed funding from Clean Harbors, each property owner will be required to pay installation costs and the monthly utility fee (see *What is the Project Cost?* poster).

Benefits:

- There will be no cost (or reduced cost) to the landowner other than the individual hook-up fee
- Landowner contribution is predictable

Challenges:

- Total project cost may be higher if agreement for grant funding cannot be negotiated quickly
