## Highway 834 Construction

### Highway 834 bypass around the Town of Tofield

---

#### Overview

Beginning spring 2020 Alberta Transportation will start construction on a bypass route of Highway 834 around the Town of Tofield. In addition to the construction of the new route, the project will also include intersection improvements and pavement overlay of the current Highway 834 through the Town of Tofield. Construction is anticipated to span two construction seasons with an estimated completion date of Fall 2021.

#### Project Details

##### Planned construction 2020

The majority of work that will be completed in 2020 will be related to the site preparation, grading and base course for the new bypass route. The new Highway 834 around the Town of Tofield will be constructed as one lane in each direction and be approximately 5.5 km in length. Additional work may include intersection improvements at Highway 626 and Highway 834 as well as illumination throughout the project limits.

Work is anticipated to take place 7 days a week between the hours of 7 am and 7 pm, weather permitting.

Locals residents may notice increased noise and dust as a result of construction. Alberta Transportation will work with the contractor to mitigate these actions, as required.

#### Traffic Impacts

As with any construction project, travelers may experience speed reductions, lane closures and minor delays. Signage with additional information on construction timing will be posted on site a week before construction begins. Since most work in the 2020 construction season will be completed on the new route, significant delays are not anticipated. A traffic accommodation strategy is also in place to mitigate the impacts to travelers. This includes additional signage, delineation, and if required, illumination.

Please watch for all and obey all construction zone signage. For up to date information on this project, please call 5-1-1 toll free or visit [511.alberta.ca](http://511.alberta.ca)
