

Web Mapping Tutorial

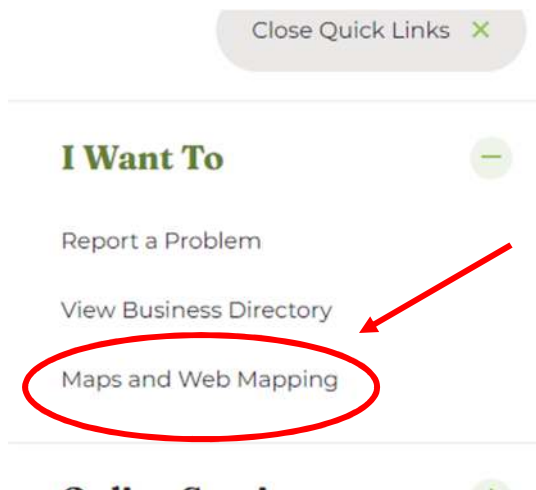

1. Go to our Beaver County website at www.beaver.ab.ca
2. In the upper right corner click on “Quicklinks”

3. Click on the plus sign beside “I Want To”

4. A drop-down menu will appear, click on “Maps and Webmapping”

5. There will be a spot to “access the site by clicking [here](#)”

Web Mapping Site

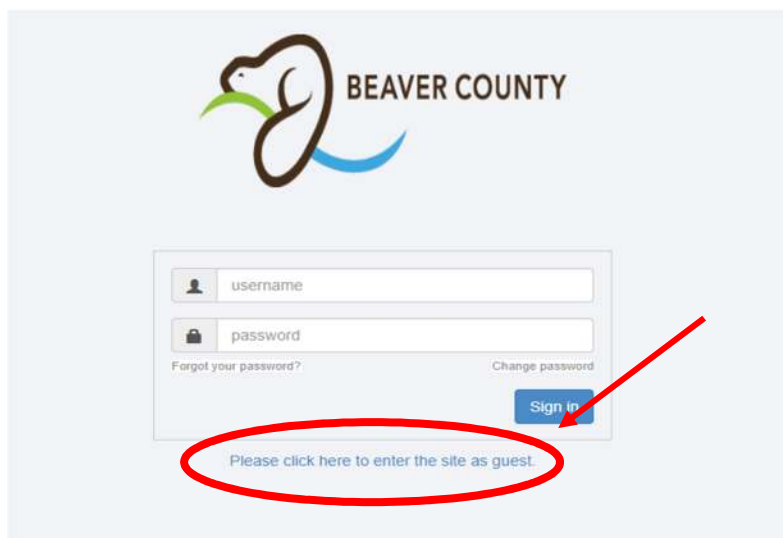

Beaver County’s web-based mapping site offers users access to location data that can be tailored by the click of a mouse.

The site will help you search for land and facilities throughout the County, create and print maps, identify your municipal electoral division, and more!

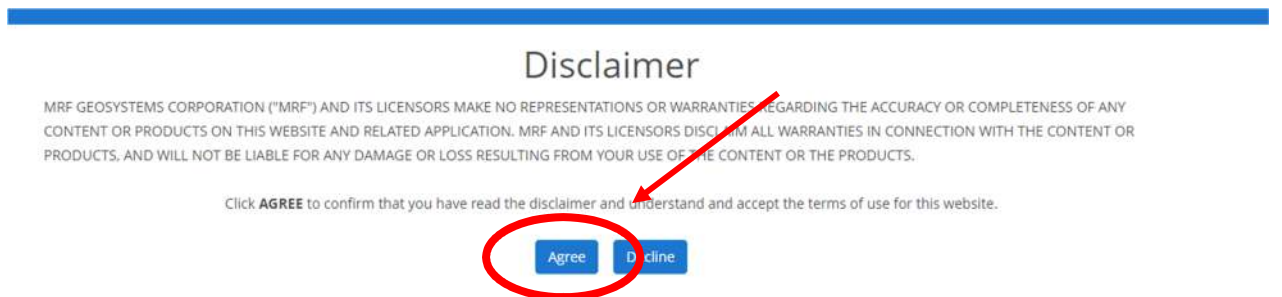

The site operates in conjunction with Geographic Information Systems (GIS) – a set of tools that captures, stores, analyzes, manages and presents data that is linked to location(s) throughout the County. Beaver County uses GIS for planning / development, road maintenance, agricultural service planning, map generation, property searches, etc.

Access the site by clicking [here](#). For instructions on using the web mapping tool, click [here](#).

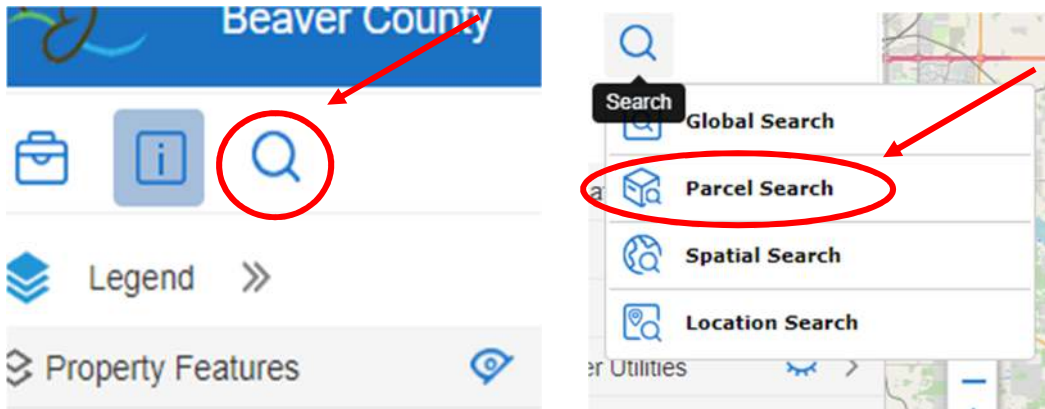

6. This will take you to the Beaver County web mapping app (MRF) “Please click here to enter the site as a guest.”

7. Read and click “agree” on disclaimer

8. This will take you to the map of Beaver County. On the left-hand side there is an array of options you can choose. To search a specific property, click on the magnifying glass, and click “parcel search.”

9. Click on “type” and a dropdown menu will appear, you can then search for the property based on the information you have on the property. (EX: LINC Number, Roll Number, Municipal Address, Plan, Block, Lot, and Spatial Location)
10. A window displaying search results will come up. To access the property, tax information, and assessment on the property, click the notebook lines button.
