Blowdown notification

Blowdown details

Date: May 14th to 18th Time: Between 7:00am and 3:00pm daily

Land location: SW 3-50-15 W4M

TC Energy land agent: Dale Beaton

Phone number: 403-801-0351

Onsite technician (blowdown co-ordinator): Darren Gunn

Cell number: 306-216-9929

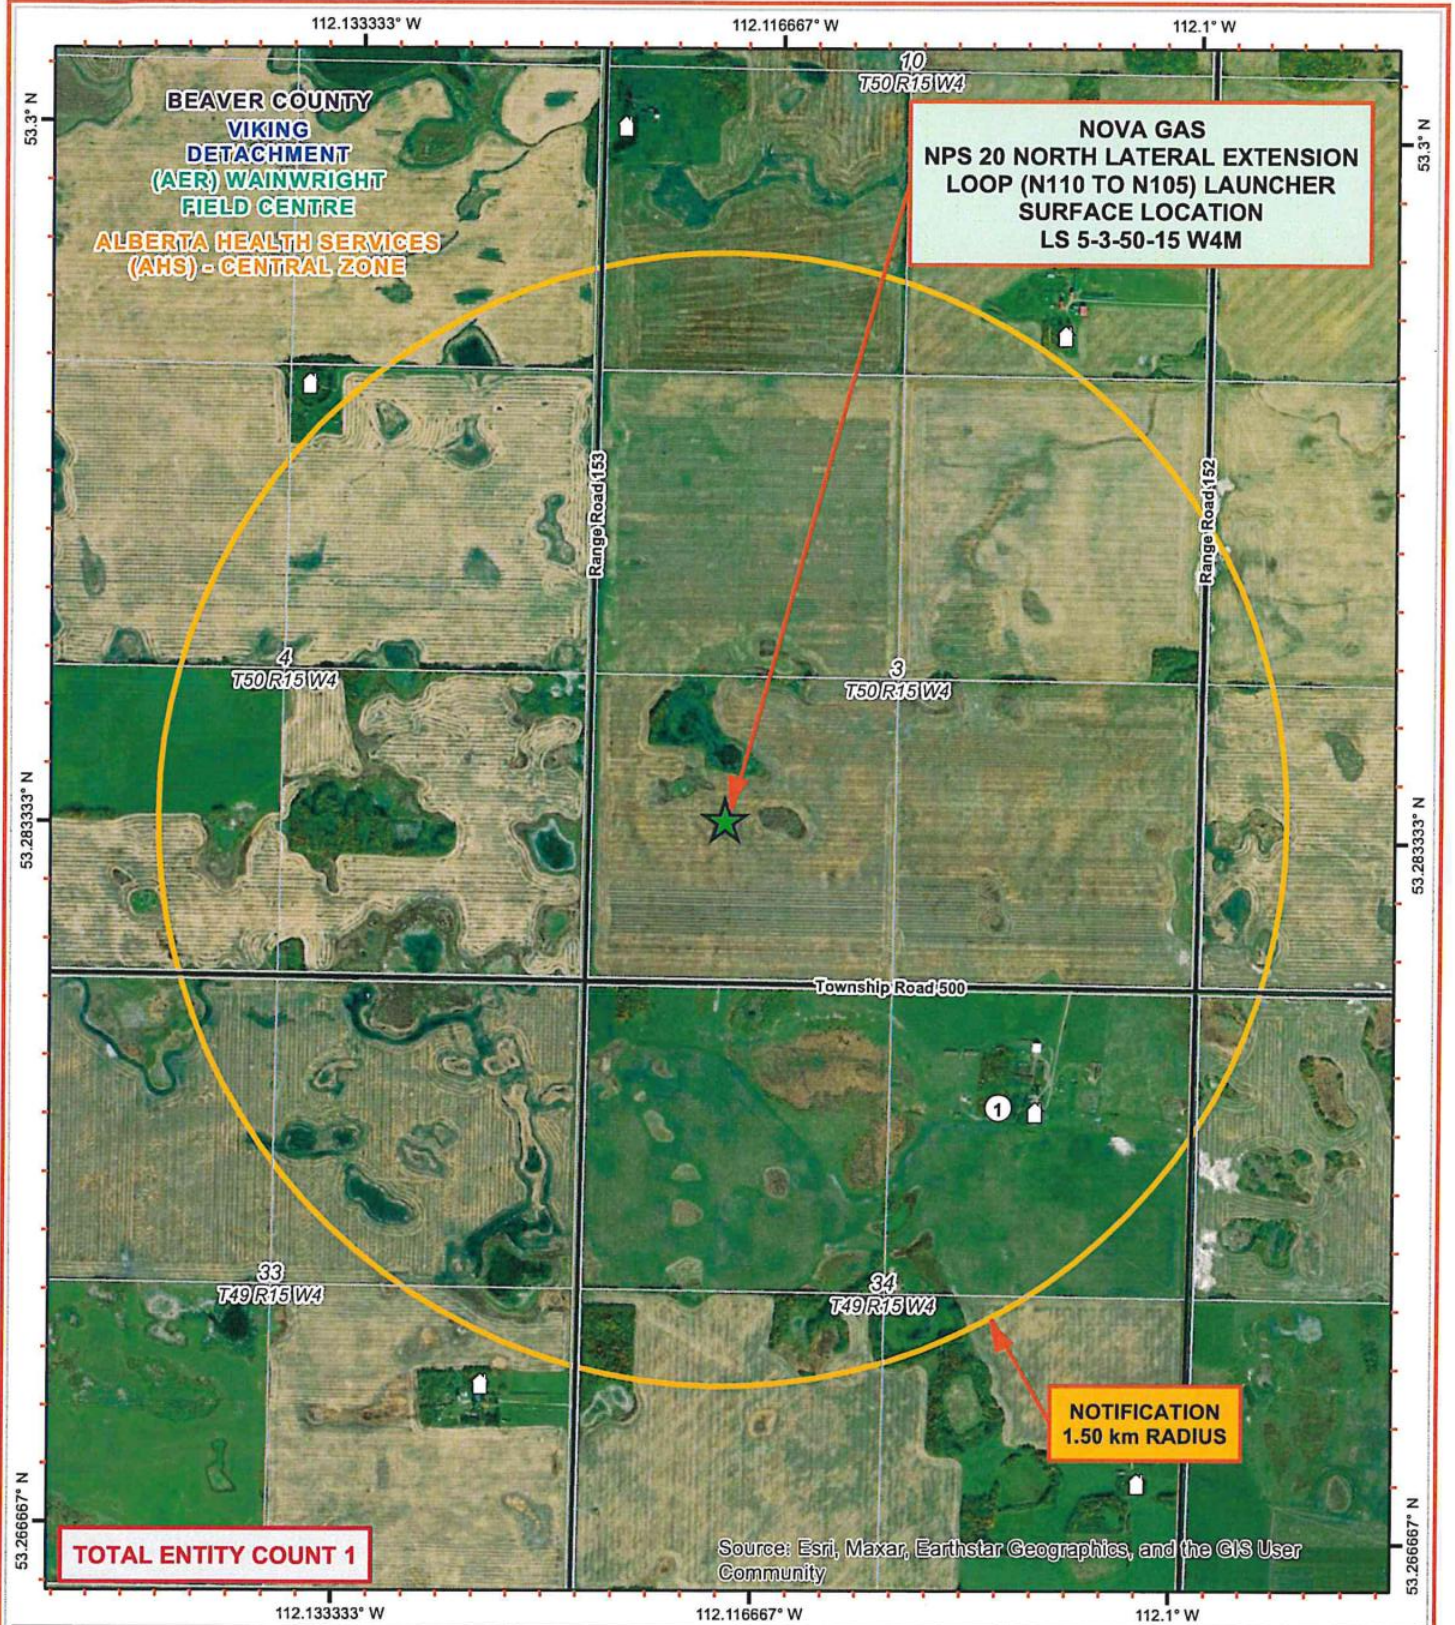

Estimated duration of blowdown: Approximately 20 minutes

Additional Notes: 2 blowdowns per day

At TC Energy, the safety of the public and our employees is a top priority. To ensure our pipeline system continues to meet the highest safety standards, we periodically perform routine maintenance as part of our Pipeline Integrity Maintenance Program. As part of this work, you may hear a sustained loud noise known as a "blowdown."

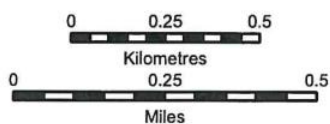

A blowdown is the act of releasing natural gas from the pipeline system so work can be done safely on the depressurized facilities. TC Energy employees will close the required valves to isolate the facilities and then open a blowdown valve to safely depressurize in a controlled manner. A loud roaring sound may occur when the natural gas is released, although TC Energy may employ tools to minimize this noise whenever possible.
