DUST CONTROL - 2ND APPLICATION	AUGUST 8	AUGUST 15	

HIGHWAY 854 AND TOWNSHIP 492 CONSTRUCTION UPDATE

The soil stabilizing for the road base with soil cement is now complete. We will soon be starting the first layer of chip seal. There will be many loose rocks after the chip seal layer is applied. Speed limits will be reduced on these roads once opened until the project is complete.

During these construction phases, portions of the roads may be closed to allow crews to work safely. Please use alternate routes, and be cautious while driving through these zones (local traffic only).

Beaver County's goal is to provide a healthy, injury free work environment for all employees, contractors, visitors, and the general public. Already this year we have had people exceeding the posted speed limits in construction zones, endangering staff, contractors, and the public. There are potential hazards to the public and to vehicles during the construction process. This can include heavy machinery, dust or mud, road material such as gravel, asphalt coatings, and rock chips. We apologize for the inconvenience that road maintenance and upgrading causes, but the same roads that receive the most traffic also need the most maintenance. Thank you for your patience and understanding during this construction season. If you have any questions, please call the Beaver County Service Centre.

DUST CONTROL PROGRAM

The Fall Dust Control Program is now open for applications! If you have participated in our program before, letters were sent out on June 5th, but for new applicants, simply visit our website to access the application form under Services > County Roads > Dust Control, or scan the QR code with your phone...

TRAIN WHISTLE CESSATION

If you live in Bruce or Lindbrook, you may have noticed the absence of a certain whistling noise over the last couple of days. The process of ceasing the train whistles in these locations has now been completed. There may be a few exceptions as the train engineers adjust to the change, but from now on there will be significantly less whistling if any at all.
